Career Objective

Dedicated Software Development Engineer with **3+ years** of experience in backend engineering, software development, and building scalable, high-performance systems. Currently working at **GlobalLogic for Adobe**, contributing to **Adobe Campaign Standard** and **Classic Web UI,** with a focus on backend problem-solving, solution implementation, and feature enhancements to improve product functionality and performance. Previously contributed to **Star Sports – Starverse**, supporting **1.2 million** concurrent users on launch day, and backend development for Jack & Jones. Skilled in API development, system optimization, and database management, with a passion for solving complex technical challenges and delivering reliable, scalable software solutions.

Experience

GlobalLogic (A Hitachi group company) – Full-time - (Working for Adobe) **April 2025 – Present**
Engineer

- **Troubleshoot and resolve complex issues** across **Adobe Campaign Standard** and **Classic Web UI,** including backend, infrastructure, and connectivity challenges.
- Analyze and debug **campaign workflows, deliveries, APIs, integrations,** and backend processes to identify root causes and implement solutions.
- Handle backend problem-solving, solution implementation, and **feature enhancements** to improve system functionality, reliability, and performance.
- **Support server monitoring, configuration optimization, and technical issue resolution across Adobe Campaign environments.**

Ink In Caps Labs – Full-time **Aug 2023 – Dec 2024**
Software Development Engineer (SDE)

- Played a key role in developing the backend of the metaverse platform for **Star Sports - Starverse**, managing over **1.2 million concurrent users** on launch day and **200,000 to 500,000 simultaneous users** daily, and contributed to backend development for **Jack & Jones.**
- Skilled in designing and implementing complex **RESTful APIs** for efficient data communication and hands-on experience with **RabbitMQ** and **FFmpeg** for media optimization along with other third-party API integrations.
- Capable of building and maintaining scalable, enterprise-grade applications using **Nest.js**.
- Highly skilled in designing and optimizing **MongoDB Complex Aggregation Pipeline Queries**.
- Experienced in developing and optimizing **Analytics modules** using **MongoDB Aggregations**, **Time-series data handling**, and **Scheduler integrations**.
- Skilled in delivering **accurate insights** to drive data-informed decision-making, enhance operational efficiency, and support strategic growth by identifying key trends and performance improvement areas for the organization.

Infotech Hub – Internship **Mar 2023 – July 2023**
SDE Intern

- Build and maintain RESTful APIs to support frontend functionality, ensuring efficient and secure data transfer, and collaborate with the development team to design, develop, and implement robust and scalable backend solutions using **Node.js, Express.js, and MongoDB.**
- Implementation of API endpoints and development of middleware to handle requests and responses from external services.
- Implementation of **authentication and authorization** mechanisms to secure API endpoints and user data and manage permission for APIs among different users using **middleware functions**.
- **Unit Testing** the Code and Testing the API Functionalities using Postman.
- Conduct code reviews and provide constructive feedback to team members to maintain **Code Quality** and **Adherence to Best Practices**.

Indian Achievers Story – Internship **Nov 2022 – Feb 2023**
Frontend Developer

- Developed the website for the company according to its business needs. Ensure HTML, CSS, and shared JavaScript are valid and consistent across different devices and cross-browser applications, Optimized Website responsiveness.

- Lead the entire web application development right from the concept stage to delivery and deployment

Technical Skills

Front-end Development - HTML, CSS, JavaScript, React JS

Back-end Development - Node JS, Nest JS, Express JS, MongoDB.

Languages - JavaScript, Typescript

Cloud-Technologies - Docker, Amazon Web Services.

Product – Adobe Campaign.

Version-Control - Git/GitHub.

Tools - Postman, Figma.

Projects

- **Disney + Hotstar and Star-Sports – Starverse** (A metaverse platform that allows users to interact with each other, play quizzes, interactive games, etc**) Website link**
  Tech Stack - **NodeJS, ExpressJS, MongoDB, Milicast, Redis, AWS.**

- **Jack & Jones -** (An interactive website that was used to present Jack & Jones' Unmatched Apparel Series) - **Website link**
  Tech Stack – **NodeJS, Express.JS, MongoDB, AWS.**

- **Knky –** (Knky is a UK-based adult social media platform - **NSFW**) - **Website link**
  Tech Stack - **NestJS, MongoDB, TypeScript, RabbitMQ, FFmpeg, Redis, AWS.**

- **Tea-Pro – (Project Management System** - As this is now serving as a template for other companies, the project link cannot be shared publicly)
  Tech Stack - **NodeJS, ExpressJS, MongoDB, ExcelJS, AWS**

- **IMDB React–app** - **(Tech Stack - ReactJS, HTML, CSS, JS, TMDB API Integration)** - **Website link**

Education

Shambhunath Group of Institutions

Bachelor of Computer Application
Prayagraj, Uttar Pradesh, India
Nov 2021 - May 2024

Accurate Group of Institutions

Masters of Computer Application
Noida, Uttar Pradesh, India
Aug 2024 - June 2026
